Introduction

Welcome to the administrator guide of Health tracking system. This guide will help you to understand the main principles of this system. It helps you to understand how to manage both patients and doctors.

The image below shows the admin dashboard

[illegible]

Mange Patients

The administrator can manage patients (add, edit, and remove).

1. Add patient:

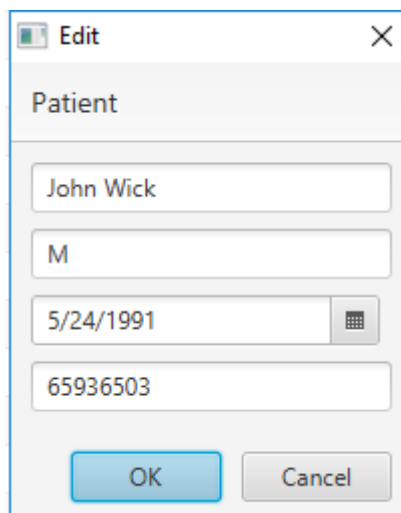

The administrator can add a new patient to the system by simply clicking the “add patient” button, and then filling all the fields (name, gender, date of birth and phone number) And finally click ok. If the admin did not fill all the fields and clicked ok, then an error message is going to display on the screen.

A screenshot of a web application dialog box titled "Add new" with a close button (X) in the top right corner. The dialog has a header section labeled "Patient". Below the header, there are four input fields: "Name", "Gender", "Date of birth" (pre-filled with "1/1/1990" and a calendar icon), and "Phone number". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

2. Edit patient:

The administrator can edit an existing patient by simply selecting a patient who need to be edited, and click the “edit patient” button, then the admin can change whatever he wants and click ok. If the admin did not fill all the fields and clicked ok, then an error message is going to display on the screen.

A screenshot of a web application dialog box titled "Edit" with a close button (X) in the top right corner. The dialog has a header section labeled "Patient". Below the header, there are four input fields: "Name" (pre-filled with "John Wick"), "Gender" (pre-filled with "M"), "Date of birth" (pre-filled with "5/24/1991" and a calendar icon), and "Phone number" (pre-filled with "65936503"). At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

3. Remove patient:

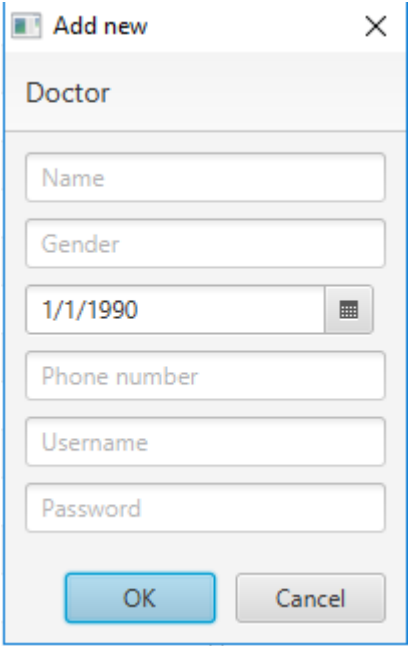

The administrator can remove an existing patient by simply selecting a patient who need to be deleted and click the “remove patient” button.

Manage doctors

The administrator can manage doctors (add, edit, and remove).

1) Add doctor:

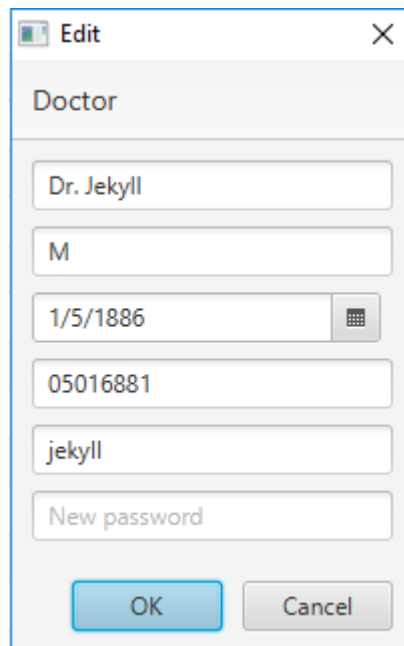

The administrator can add a new doctor by simply clicking “add doctor” button, and then filling all the fields (name, gender, date of birth, phone number, username and password). And finally click ok. If the admin did not fill all the fields then an error message is going to display on the screen.

The image shows a dialog box titled "Add new" with a close button (X) in the top right corner. Below the title bar, the word "Doctor" is displayed. The dialog contains six text input fields stacked vertically: "Name", "Gender", "Date of birth" (pre-filled with "1/1/1990" and a calendar icon), "Phone number", "Username", and "Password". At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

2) Edit doctor:

The administrator can edit an existing doctor by simply selecting a doctor who need to be edited, and click the “edit doctor” button, then the admin can change whatever he wants and click ok. If the admin did not fill all the fields and clicked ok, then an error message is going to display on the screen.

The image shows a Windows-style dialog box titled "Edit" with a close button (X) in the top right corner. The dialog has a header section labeled "Doctor". Below the header, there are six text input fields stacked vertically. The first field contains "Dr. Jekyll", the second contains "M", the third contains "1/5/1886" and has a small calendar icon to its right, the fourth contains "05016881", the fifth contains "jekyll", and the sixth is labeled "New password" in a lighter font. At the bottom of the dialog, there are two buttons: "OK" and "Cancel".

3) Remove doctor:

The administrator can remove an existing doctor by simply selecting a doctor who need to be deleted and click the “remove doctor” button.
