## Introduction

Welcome to the doctor guide of Health tracking system. This guide will help you to understand the main principals of this system. It helps you with starting to log in the system and to check patient data.

## Log in

The page for log in is very simple to use.

First, you need to input the name, and after to input the password. If the name or password will be inputted with some mistakes, we will get a notification that something is wrong.

Doctor dashboard

### Log in

Name:

Password:

## List Patients

After your successful log in in the system, you will get a special list with all patients which a connected with you.

Doctor dashboard Patient list

Log out

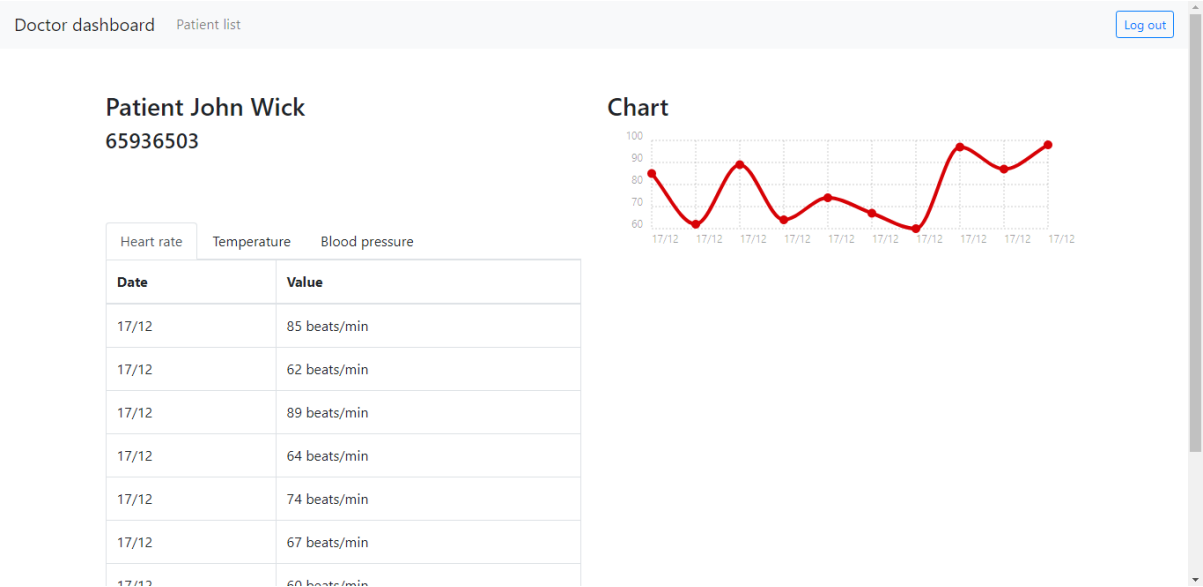

### Patient list

ID	Name	Gender
1	John Wick	M
2	Ethan Hunt	M
3	James Bond	M
4	Jason Bourne	M

By simple clicking on one of them, you will get all measurement data of him.

## Check Patient's measurements

After selecting of one of the patients, you will get the same table like on the screenshot below.

You will get three options to select: Heart rate, Temperature, and Blood Pressure. By clicking on one of them, you will see different types of measurements.

## Log out

Of course, that when you will be done with everything, you will want to make a log out. It is also very simple process.

Doctor dashboard Patient list

Log out

### Patient list

ID	Name	Gender
1	John Wick	M
2	Ethan Hunt	M
3	James Bond	M
4	Jason Bourne	M

By clicking on “Log out” button in the right corner, you will be returned to the main page of log in from the first step.
